

# INSTALLATION INSTRUCTIONS

## 35-42 POLE KIT

**Warning:** This batting cage system is not designed to withstand strong winds or severe weather conditions. Use your own judgment as to whether or not your batting cage needs additional bracing / support. We strongly recommend that you use long stakes, cables, and clamps to anchor the batting cage down to the ground.

## Step 1: Assembling the Frame

**Important:** Make sure to insert the ends of the poles completely into their respective 3 and 4-way fittings. **DO NOT** attempt to thread the supplied bolts through the holes in the ends of the poles – this will enlarge the frame unnecessarily and will make the frame weaker, and there's a good chance your net will not fit!

Assemble the pole sections as shown:

- 3 Pcs - 59" Straight (hole on each end) 
- 3 Pcs - 17-1/2" Swaged one end (hole on other end) 
- 6 Pcs - 59" Swaged one end (hole on other end)
